

ABOUT ME

I have been a software developer for nearly 20 years, with extensive experience in building new systems and maintaining legacy software. My role has always involved direct collaboration with the company's strategic team, whether developing solutions for end users or for internal use. I often work as a Full Stack developer, specializing in backend and DevOps, while also handling frontend implementations, though this isn't my primary focus. My core strength lies in problem-solving with a critical and analytical perspective. I consider myself more of a generalist than a specialist, as my career in technology has kept me closely connected to non-technical sectors, allowing for a broader view of the businesses I've worked in.

WORK EXPERIENCE

LAUNDRY BAG
Luzern
Jan 2024 - Present

CTO

- I am the Founder and CTO of Laundry Bag, a laundry company that provides a sustainable pick-up and delivery service. I led the development of our system and designed the business model architecture, as well as overseeing marketing strategies. The company uses green energy to power our washing machines, and we employ electric vehicles for deliveries, reinforcing our commitment to sustainable and efficient practices.

COLETA DIGITAL
São Paulo
Mar 2022 - Present

CTO

- I am also the Founder of Coleta Digital, a crowdfunding platform focused on science and education niches. The goal is to offer reduced fees for content creators in these areas, supporting the development and promotion of educational and scientific initiatives. This initiative reflects my commitment to fostering and supporting content that creates a positive impact on society.

DEL CANTÃO SOFTWARE
São Paulo
May 2019 - Present

IT Consultant

- I offer consulting services for companies looking to upgrade or enhance their software infrastructure, providing efficient solutions tailored to their specific needs.

THINK DATA
São Paulo
Jul 2018 - Oct 2024

Founding Partner and Lead Developer

- I was one of the founding partners and was also responsible for designing, managing, and implementing the company's technological solutions.

SISTEMAS TH
São Paulo
Mar 2015 - Jun 2018

Senior Software Developer

Some of my responsibilities in Sistemas TH

- Software development for integration with a Call Center, optimizing communication and customer support.
- On-premises server procurement and capacity planning.
- Participation in strategic meetings to support management in decision-making. Responsible for the design and management of a wide range of systems, ensuring quality and operational efficiency.

SISTEMAS TH
São Paulo
Nov 2012 - Mar 2015

Mid-Level Software Developer

- Creation of Web APIs for service integration.
- Development and maintenance of corporate websites, integrating front-end (HTML, CSS, JavaScript) and back-end (MySQL, SQL Server, PHP, .NET Core, and .NET Framework).
- Process automation, synchronization via FTP, and monitoring with email and SMS alerts.
- Leadership in ERP modeling, architecture, and development, including integration with São Paulo City Hall's Electronic Invoice (NF-e) and bank slips.
- Data management and replication in relational databases across data centers.
- Requirements analysis and development of Windows and Web systems, with a focus on performance.

SISTEMAS TH
São Paulo
Jan 2011 - Nov 2012

Junior Software Developer

- Writing IT Help Desk documentation.
- Maintenance of on-premises servers.
- User support for internal and external systems.
- Participation in discussions and development of small internal company projects.

SISTEMAS TH
São Paulo
Jun 2010 - Jan 2011

Intern

- Writing IT Help Desk documentation.
- Maintenance of on-premises servers.
- User support for internal and external systems.
- Participation in discussions and development of small internal company projects.
